My training and interests lie at the intersection of social psychology, neuroscience, and positive psychology. One of my research areas deals with the mind-body connection, for example through exploring alterations in the sense of embodiment, the placebo effect, and mindfulness. A second central research area of mine focuses on prosociality: empathy, perspective-taking, altruism, loving-kindness, and self-control. I am also passionate about open science, reproducible science, and data science using R (this CV was made in R too).
